1. COUNTRY HIGHLIGHTS

Some 76% of respondents in Latvia consider climate change a serious problem, although only 7% see it as the most serious problem facing the world.

Respondents in Latvia are significantly less likely to say they have personally taken some action to fight climate change in the past six months (23%, below the EU average of 49%). However, when presented with a list of practical measures, the proportion increases to 94%, showing that many do not connect certain activities with tackling climate change. The results for some activities are considerably higher than in the 2013 survey and than the EU average. Practical measures taken include:

- Buying locally produced and seasonal food (64%, +16 percentage points since 2013 and above the EU average of 49%)
- Using environmentally-friendly alternatives to private cars (51%, +24 percentage points and above the EU average of 36%)
- Choosing energy-efficient household appliances when buying new (50%, +26 percentage points and above the EU average of 42%)

There is strong support for national action on improving energy efficiency (86%) and increasing the use of renewable energy (80%) by 2030. Some 88% agree that fighting climate change will only be effective if all countries of the world act together.

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QA1a Which of the following do you consider to be the single most serious problem facing the world as a whole?
(%)

QA1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS)
