Climate Change

Hungary

May - June 2015

1. COUNTRY HIGHLIGHTS

Nearly three-quarters of respondents in Hungary think climate change is a "very serious" problem (73%), above the EU average (69%). When compared with other problems, 14% identify it as the most serious problem facing the world (close to the EU average of 15%), a rise of four percentage points since 2013.

Almost half of the respondents think business and industry are responsible for tackling climate change (49%, compared with the EU average of 35%).

Respondents in Hungary are slightly more likely than average to say they have personally taken some action to fight climate change in the past six months (52%). When presented with a list of specific measures, the figure is even higher (88%). Practical measures include:

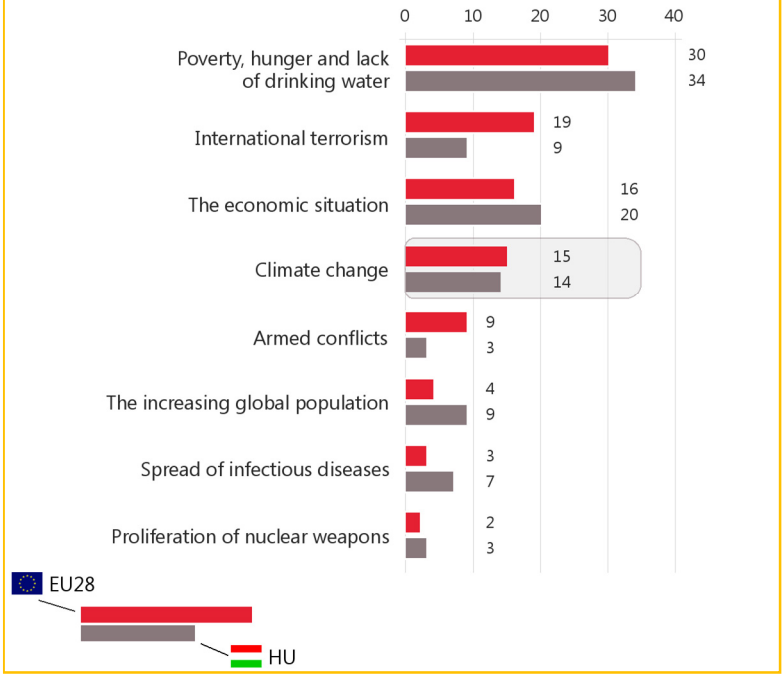
- Trying to reduce waste and regularly separate it for recycling (58%, +8 percentage points since 2013)
- Trying to cut down consumption of disposable items whenever possible (52%, +5 percentage points since 2013)
- Buying locally produced and seasonal food whenever possible (33%, +8 percentage points since 2013)

More than nine in ten respondents (94%) agree that fighting climate change will only be effective if all countries of the world act together.

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QA1a Which of the following do you consider to be the single most serious problem facing the world as a whole?

(%)



QA1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS)

(%)
