1. COUNTRY HIGHLIGHTS

Respondents in Lithuania are concerned about climate change, but slightly less so than the EU average. Some 12% of them identify climate change as one of the most serious problems facing the world. However, more than six in ten respondents think it is a “very serious” problem (62%).

Respondents in Lithuania are less likely than average to say they have personally taken any action to fight climate change in the past six months (38%, below the EU average of 49%). However, when they are asked about practical measures that help tackle climate change, the proportion increases dramatically (90%):

- Two-thirds say they have tried to reduce their waste and regularly separate it for recycling (67%, +22 percentage points since 2013)
- 43% have tried to cut down their consumption of disposable items whenever possible (+6 percentage points since 2013)
- 41% have bought locally produced and seasonal food (+14 percentage points since 2013)

A strong majority support national action to improve energy efficiency (90%) and increase the use of renewable energy (89%) by 2030. More than nine in ten respondents (94%) agree that fighting climate change will only be effective if all countries of the world act together.

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QA1a Which of the following do you consider to be the single most serious problem facing the world as a whole?
(%)

QA1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS)
(%)
