1. COUNTRY HIGHLIGHTS

Climate change is considered the most serious problem facing the world in Denmark. Indeed, 30% of respondents in Denmark say that this is the most serious issue, well above the EU average (15%).

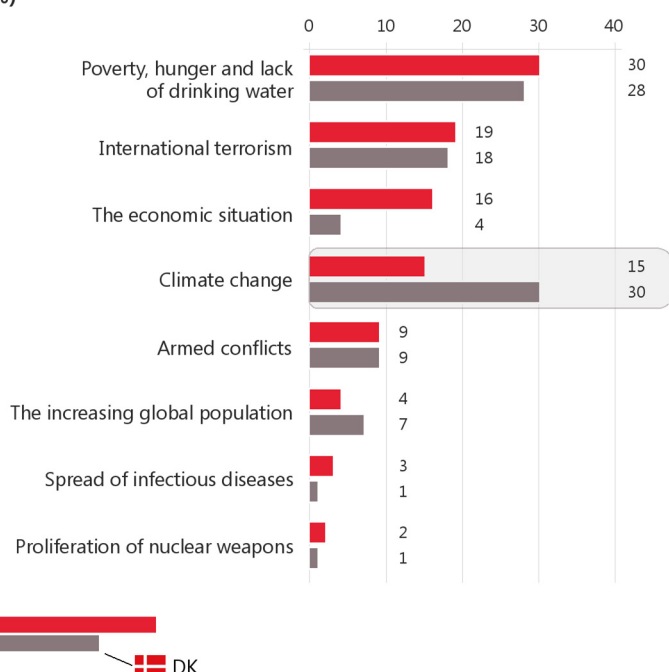

More than half of respondents in Denmark say they have taken personal action to fight climate change over the past six months (53%). However, as in most EU countries, in practice many more respondents have actually taken measures to combat climate change (96%). This includes:

- Trying to reduce waste and regularly separate it for recycling (72%, no change since 2013)
- Trying to cut down consumption of disposable items like plastic bags (66%, +8 percentage points since 2013)
- Choosing energy-efficient new household appliances (65%, +8 percentage points since 2013)
- Buying locally produced and seasonal food (53%, +7 percentage points since 2013)
- Using environmentally-friendly alternatives to private cars (53%, +7 percentage points since 2013)

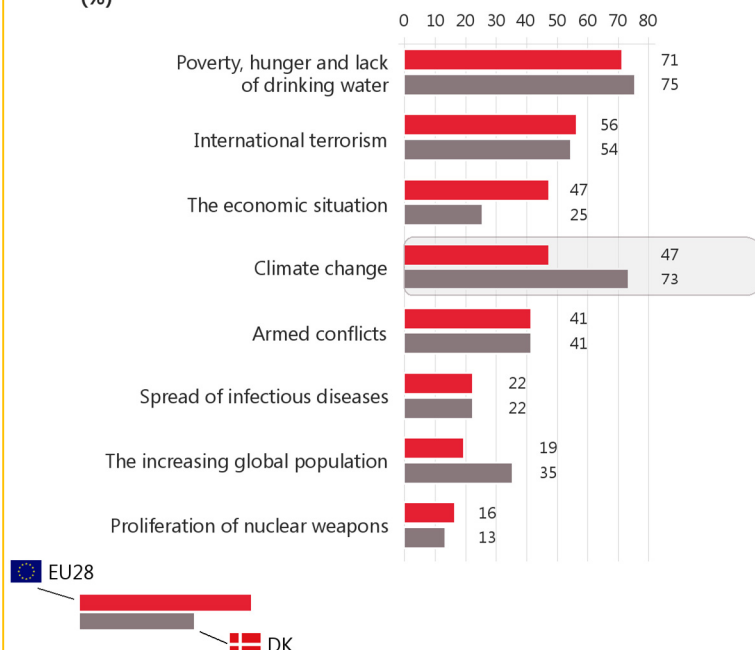

More than nine out of ten (94%) agree that fighting climate change will only be effective if all countries of the world act together. There is strong support for national action to improve energy efficiency (95%) and increase the use of renewable energy (94%) by 2030.

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QA1a Which of the following do you consider to be the single most serious problem facing the world as a whole?
(%)

QA1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS)
(%)
